

WHY PURSUE AN ARTS AND SCIENCE CERTIFICATE?

Certificates offer a way for students to mix and match interests and demonstrate unique combinations of expertise. You can create your own educational journey, gaining the skills employers are looking for and attaining multiple credentials that will set you apart.

Arts and Science certificates can be completed before, during or after a degree, and the courses required can be used toward degree requirements, often as electives. If you plan well, you could graduate with a degree and a certificate without taking any extra classes in your three or four years in the College of Arts and Science!

EXPLORE THE ARTS AND SCIENCE ADVANTAGE

The College of Arts and Science is the only college of its kind in Western Canada, with the arts and the sciences studied in one collegial environment. Arts and Science students explore courses from the sciences, the social sciences, the humanities and the fine arts. This well-rounded experience is precisely what sets our students apart. Not only will you have a wide range of courses and programs to choose from, as a student in the College of Arts and Science you will become skilled in complex decision making, critical thinking and creative problem solving.

Our students, researchers, scholars and artists regularly work together, across disciplinary boundaries, to address today's most pressing issues. As part of our community you will gain first-hand experience in this process through internships, undergraduate research and community-engaged learning opportunities. Once you graduate from the college and become one of our more than 50,000 alumni around the world, we know that you too will be the idea-maker or the problem solver that the world needs.

READY TO APPLY?

We acknowledge that we live and work on Treaty 6 Territory and the Homeland of the Métis. We pay our respect to the First Nations and Métis ancestors of this place and reaffirm our relationship with one another.
